

I am writing because I am extremely concerned about the proposed relaxation of rules governing how many media outlets the big conglomerates can own. We will have no public-interest media or freedom of the press left in our country if this deregulation is allowed to take place! I'm also outraged that this decision is being rushed to meet a June 2 deadline, when most of the public is unaware that it is even happening! There must be full public disclosure and ample opportunity for public input. This "stealth" attempt by media conglomerates to control the US airwaves, and thereby US public opinion, must be stopped NOW.
